EAST HALL, 1919

Founded In 1887, Pratt Institute was the vision and eventual creation of Charles Pratt. By being unsatisfied by other the programs of mainstream institutes around the country he set out to create a place of learning that would teach its students practical skills that would become easily applied to the workplace of the time period. As traditional degrees were viewed as incomplete by its founder, offering only teaching in the liberal arts Pratt Institute was molded as learning center for both the mental and physical. Charles Pratt believed in a solid education in the liberal arts, but had noticed that the apprenticeship system had faded out of existence. With this in mind, a machine shop building consisting of a metal working and wood working forge and foundry. Based upon its early layout as an industrial school, there has long existed a myth that the institute was originally intended to become a shoe factory if the institute failed as a place of learning.

Pratt's opening was marked by a drawing class of 12 students held October 17, 1887. As Pratt was loosely intended as a vocational school, diplomas were not actually granted until the late 1930's. During the period between the first and second world wars, there became a much greater need for specialized education in the work force. Observing this growing need, Pratt began awarding four year bachelor degrees in 1938. Early teachings involving the foundry, building trades, and industrial art evolved into the areas of sculpture, architecture, and communication design respectively.

how does your body
react to others?

BEST ROULER IN TOWN

FOR THE WORST

I've matured ever so nicely Like a wine.

Stayed the same

I have acquired a disgusting film on my entire body that won't go away. I think the only thing that's changed about me is that I'm 3.5 ft taller. I really can't think of anything else.

Pratt forced me to be a greedy, manipulative and egotistical bastard. I got use F to it. Liver, sold to make up the cost of Twitter.

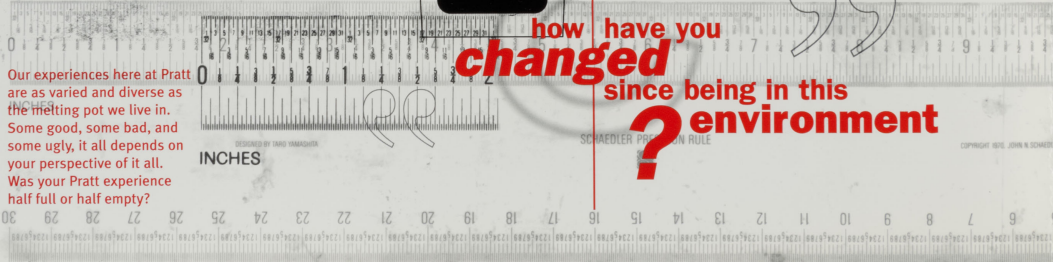

I've changed my clothes approximately 460 times in the past 30 days. Fuckin' good.

GROWN IN ALL WAYS EXCEPT MY EIGHT. I'm still the same person. Except my hair has been changed in different colors and different lengths.

how have you changed since being in this environment?

Our experiences here at Pratt are as varied and diverse as the melting pot we live in. Some good, some bad, and some ugly, it all depends on your perspective of it all. Was your Pratt experience half full or half empty?

pratt manhattan

Separated at birth, "the other" Pratt resides in Manhattan's beautiful downtown section in close proximity to such cultural gems as Canal Street and the Bowery. Feeding off Pratt's main campus as if a five mile umbilical cord connected the two, this small gathering of students strive to gain the label of a Pratt student while snubbing the realness that is the Brooklyn living experience.
